Hiring Team

Deloitte Consulting LLP

Manufacturing & Operations Practice

Dear Hiring Manager,

I am writing to apply for the MES Functional Consultant role at Deloitte. With hands-on experience in manufacturing operations, shop floor digitization, Lean/Six Sigma process improvement, and data-driven operational analytics at a high-volume industrial facility, I am excited to bring that plant-floor expertise to Deloitte's industrial clients.

At Tesla, I work at the intersection of manufacturing operations and digital transformation every day. I translate operational needs into structured process requirements and qualification protocols -- commissioning two electrode production lines to 98% yield by applying end-to-end manufacturing process knowledge across production, quality, maintenance, and inventory. I applied Lean and Six Sigma methodologies (FMEA, DOE, SPC, 8D, 5-Why, Capability Study) to identify root causes of production excursions and drive measurable improvements. I also digitized shop floor monitoring by building a real-time Grafana dashboard tracking tool performance metrics, authoring SOPs for sensor integration, and leading structured root cause analysis on non-conformance events -- the same operational readiness and change management work Deloitte's clients need.

Earlier, I built a predictive failure-detection model (25% efficiency improvement) and a Computer Vision quality inspection system at Scherdel SST -- both in plant environments with real production constraints. I also developed and deployed data pipelines using MySQL, Python, R, and JMP to surface operational insights for engineering and business stakeholders, demonstrating the cross-functional influence and communication skills consulting requires.

Outside of my core role, I built DataIQ (github.com/Sachin1bala1), an open-source AI-powered database IDE -- reflecting my drive to apply technology as an enabler of operational performance, not just for its own sake. That mindset aligns directly with Deloitte's approach to MES as a manufacturing operations enabler.

I am based in Austin, TX and ready to support Deloitte's industrial clients in their shop floor digitization and operational excellence journeys. Thank you for your time and consideration.

Sincerely,

Sachin Bala
